

# Mobile Warehouse Management

Seamlessly integrates with SYSPRO Impact Software via the SYSPRO e.net business solutions.

**qwikTrak WMS™** is a starter Warehouse Management System (WMS) for those who need to improve the management their warehouse, but don't need a full-blown WMS. qwikTrak WMS™ is designed to implement fast but can grow as your organization grows and changes with your market by offering a path to our full WMS, megaTrak WMS™. qwikTrak WMS™ offers all the basic inventory transactions, WIP processing as well as pick pack and ship functions on both PC and Mobile Devices. qwikTrak WMS™ will drive process improvement, inventory accuracy and improvement in order fulfillment speed and accuracy, which allows customers to start simple with a full Warehouse Management System and scale as their business grows.

# qwikTrak v.4.0 Features

## RECEIVING

- PO receipts
- Warehouse transfer receipts
- ASN receipts
- Inspection handling
- Pallet license plating
- Landed Cost Tracking Receipts

## PICKING

- Whether picking sales orders, work orders, warehouse transfers or supplies issues, megaTrak's picking functionality will optimize resources through batch and/or split picking. Real-time data collection on mobile devices and computers provides 100% inventory accuracy.
- All picking functionality applies whether picking for work orders, sales orders or transfer orders. Issue materials to work orders.
- Choices of paperless or paper pick lists.
- Simple (single sales order) picks – paper or handheld
- Batch picks – paper or handheld
- Directed Picks
- Automatically release orders in batches, waves and singles

## WIP

- Work order picks to deliver materials to jobs or production areas
- Issue materials to work orders
- Back flush materials to work orders
- Record operational progress
- Issue standard labor to work orders
- Record actual labor to work orders
- Material receipts from work orders

## INVENTORY

- General transactions — receipts, issues, scrap, adjustments, moves
- Bin transfers
- Hold / release handling at the serial, lot, pallet, bin or stock code levels
- Serial and Lot number handling
- Cycle counts (both directed and non-directed)
- Physical counts
- Multi-tiered inventory tracking / transactions
- RMA, RTV and Return to Stock (RTS) modules
- Supports SCT and GIT modules

## SHIPPING

- Simple shipping — enter basic freight information to post to sales order
- Small box carrier integration
- UPS, FedEx, Purolator, Canada Post and US Postal Service. qwikTrak communicates directly to vendors and gives the ability to get tracking numbers, rates and create labels right out of the WMS.
- Direct posting to carriers from qwikTrak or via World Ship and Ship Manager
- LTL, full truck and container shipping

## ARCHITECTURE

- Multiple mobile platforms available: Android, Windows Mobile, Windows, iOS (v.4.5).
- Uses REST services for all communication and transaction posting.
- Works in both on-prem and Cloud configurations (IaaS, PaaS).
- Full REST API available.
- Fully upgradable to megaTrak WMS™, our full warehouse management system.
